ABOUT US

WHAT IS WE MARS ABOUT?

WEMARS started in 2010 as a team of engineering students at Western University helping to cultivate the first 2 FIRST Robotics Competition (FRC) teams in London, Ontario. Now, the team aims to design, create, and test Mars rovers. We are planning to compete in two competitions this year, including the University Rover Challenge in Utah. WEMARS is split into 5 subteams.

Eugen Porter
Founder of WE MARS

THE EXECUTIVE TEAM

Thomas Naish and Clara Levy President and Vice President

Responsibilities

- Manages events and activities
- Supervises sub teams to ensure rover development progresses smoothly
- Facilitates communication between sub teams

Nathan Eng and Syed Rad Business Leaders

Responsibilities

- Handles outreach to potential sponsors
- Maintains ongoing relationships with sponsors
- Ensures a steady flow of support and resources for club activities and events

Hanro Delport and Isabel Naish Mechanical Leaders

Responsibilities

- Designs, tests, and builds the rover chassis and arm
- Researches and develops methods for casting carbon fiber rover components

Wyatt Welyhorsky and Sean McBride

Electrical Leaders

Responsibilities:

- Oversees and designs electrical components of the rover
- Projects include motor board and controls, power distribution and battery management, sensor and microcontroller implementation, and digital communication

Abeer Muhammad and Dev Patel

Software Leaders

Responsibilities:

- Develops communication standards between homebase and rover for mission success.
- Designs software subsystems, including GPS, Cameras, LIDAR, and Drive Control

James Krizsan and Armin Bradaric

Science Leaders

Responsibilities:

- Researches methods of analyzing soil to find definitive signs of life
- Designs the mechanical systems required to test the soil autonomously
